

Real Commitment to:

Healthcare that strengthens health

Doctors' offices are overloaded, hardly any new appointments - Elmshorn urgently needs better medical care. I want to act before it's too late.

#### MY COMMITMENTS

- Reform of demand planning - realistic & future-proof
- Securing & expanding outpatient services after the hospital closure
- "Round Table on Health" with all relevant stakeholders
- Strengthening medical services - from GP practices to physiotherapy

Because health should never depend on luck or income.

Real Commitment to:

Housing that offers everyone a home

Elmshorn is growing - and housing must not become a luxury. I am committed to more housing, fair rents, and livable neighborhoods.

#### MY COMMITMENTS

- New housing through densification & urban redevelopment
- Preservation of 2,000 social housing units & clear quotas in new builds
- Housing options for trainees, students & older people
- Inclusive, barrier-free neighborhoods for all generations
- Considering infrastructure from the start: daycare centers, schools, transport
- Close coordination with surrounding areas in housing development
- For a livable, diverse Elmshorn - with housing for everyone.

Real Commitment to:

A city that attracts families

I stand for a family-friendly city with strong daycare centers, good schools, and real opportunities for children and young people.

#### MY COMMITMENTS

- Faster expansion of daycare centers & planning security
- Advancing all-day schools - socially tiered fees!
- Securing spaces for exercise & sports for all children
- Expanding leisure & meeting opportunities for young people
- Strengthening cooperation with clubs & volunteers
- For an Elmshorn where young families can live well - today and tomorrow.

Real Commitment to:

A city center that invites you in

Our city center has more to offer than many think. I want to develop it further - lively, safe, and welcoming.

## MY COMMITMENTS

- Attractive shopping, dining & cultural offers
- More safety through lighting, presence & video surveillance around the station
- Cleanliness through city cleaning & public order services
- Clear measures against crow and pigeon droppings
- Upgrading Steindamm Park - with ideas from citizens
- For a city center where people enjoy spending time - day and night.

Real Commitment to:

Urban redevelopment that benefits everyone

Elmshorn is growing - and visibly so! Town Hall, Buttermarkt, and Knecht's Halls are just the beginning. I want to advance redevelopment boldly but with consideration for everyone involved.

## MY COMMITMENTS

- Preservation of the "Green Belt" along the Krückau River
- Traffic-calmed, barrier-free neighborhood with sufficient parking space
- Spaces for culture, children, and young people in the redevelopment area
- Shaping the future - with heart, reason, and the people on site.

Real Commitment to:

An energy transition that everyone can afford

Elmshorn should be climate-neutral by 2035 - I support that. But: climate protection must remain feasible for everyone.

## MY COMMITMENTS

- Finally making progress at the station - for better connections to Hamburg
- Rapid renovation of municipal buildings
- Affordable heating through local heating networks
- Active advice instead of overburdening in the heating transition
- More walking and cycling - but also space and charging facilities for climate-neutral cars
- Climate protection in cooperation with the surrounding area
- Protection from flooding and heavy rain - with more greenery throughout the city
- Elmshorn can do climate - socially, concretely, and together.
